U.S. Patent and Trademark Office

Art Unit: 1625

Detailed Action

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim(s) 25 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

A. In claim 25, page 52, line 12, the phrase "1 and 2-Me-tetrazol-5-yl (mixture)" is indefinite. It is unclear as to whether or not the applicant is saying that the radical R6a can both be 1 and 2-Me-tetrazol-5-yl. However, the applicant is claiming a compound, not a mixture. So in a compound claim, 2 or more compounds can not exist.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim(s) 1, 2, 4, 5, 9, 13, 14, 15, 16, 22, 23, 24, and 26 are rejected under 35 U.S.C. 102(b) as being anticipated by Winn et. al. Win et. al. discloses the instant compounds, 32tt and 32xx. At page 2681, Table V, see the instant compound and its use as a pharmaceutical composition.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Application/Control Number: 10/634,402

Art Unit: 1625

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 7 and 23 are rejected under 35 U. S. C. 103(a) as being unpatentable over Winn et. al., teaches the compound, 32tt. At page 2681, Table V, see the compound, 32tt

The difference between the prior art compound and the instantly claimed compound is the alkyl group that is the R5 radical of the compound. In the instant compound, the R5 group is a ethyl group. In the prior art compound, the R5 group is a methyl group. The prior art compound and the instant compound are homologues of each other. Homologues are compounds that differ by a methylene linkage.

It would have been obvious to one of ordinary skill in the art to synthesize homologues of this class of compounds. Accordingly, the compounds are deemed unpatentable therefrom in the absence of a showing of unexpected results for the claimed compounds over those of the generic prior art compounds.

Claims 3, 6-8, 10-11, 1217-21, 27-32 are objected to because they are based on a rejected claim.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Binta M. Robinson whose telephone number is (571) 272-0692. The examiner can normally be reached on M-F (9:30-6:00).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Joseph McKane can be reached on 571-272-0699.

A facsimile center has been established. The hours of operation are Monday through Friday, 8:45 AM to 4:45 PM. The telecopier numbers for accessing the facsimile machine are (703)308-4242, (703)305-3592, and (703)305-3014.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (571)-272-1600.
